Surabaya, Indonesia

Informatics undergraduate student at Telkom University with hands-on experience in backend development, web application development, and artificial intelligence projects. Experienced in building scalable RESTful APIs, database systems, and AI-driven applications using Node.js, Laravel, MySQL, and Python. Passionate about software engineering, machine learning, and natural language processing, with strong analytical, problem-solving, and collaborative skills.

Education Level

Telkom University Surabaya - **Surabaya** 2022 - Now

Bachelor of Informatics , 3.8 / 4.00

RESEARCH EXPERIENCE

Telkom University Surabaya - **Surabaya, Indonesia** Jan 2026 – Aug 2024

Undergraduate Thesis Researcher: Semantic Similarity Detection for Indonesian Academic Documents

- Built and defended SemSim, a semantic similarity detection system for Chapter II (literature review) of Indonesian academic documents, using a fine-tuned IndoBERT (indobert-base-p2) Siamese bi-encoder with masked mean pooling and cosine similarity.
- Built the data pipeline (PDF extraction, cleaning, sliding-window segmentation, pair generation), producing 5,189 labeled sentence pairs.
- Evaluated with 5-fold GroupKFold cross-validation: Pearson r = 0.9602 and 75.47% four-zone accuracy, against r = 0.9061 for the best TF-IDF baseline.
- Validated labels with 5 annotators on 359 samples (Krippendorff's Alpha = 0.807) and deployed the model as a Flask web app.

Telkom University Surabaya - **Surabaya, Indonesia** Jan 2024 – Jul 2024

Student Research Assistant

- Collaborated on research related to container code reader system development.
- Implemented and optimized machine learning algorithms for object recognition tasks.
- Performed data preprocessing, model training, and evaluation.
- Contributed to research publication preparation and documentation

Work Experiences

PT cmlabs Indonesia Digital - **Malang, Indonesia** Jan 2025 – May 2025

Backend Developer Intern

- Developed and maintained backend services for a plagiarism checker platform using Node.js and MySQL.
- Designed and implemented database structures and RESTful APIs for content similarity detection.
- Improved system performance and optimized SEO-based plagiarism detection processes.
- Collaborated with engineers and testers to deliver a stable and scalable backend platform

Bandung Techno Park (Wrap Entrepreneurship Program) - Surabaya, Indonesia Feb 2026 - Jun 2026

Full Stack Developer

- Developed CoHive, a web-based cooperative management platform for financial and organizational operations.
- Built backend services using Laravel, MySQL, and RESTful APIs.
- Developed frontend components using Blade, Tailwind CSS, and JavaScript.
- Implemented features for financial management, donation tracking, and member administration.
- Delivered a functional MVP that streamlined cooperative operational processes.

Organizational Experience

Informatics Student Association, Telkom University Surabaya - **Surabaya, Indonesia** Jan 2024 - Dec 2024

Human Resource Development Staff

- Organized internal training programs, workshops, and mentoring activities.
- Assisted in planning and executing student development initiatives.
- Contributed to organizing major events including TEMATICS 2024, FORTASTICS 2024, and FUNSPORTIKA 2024.
- Served as Master of Ceremonies (MC) during the 2024 Student Election.
- Participated in evaluation and continuous improvement initiatives for organizational programs.

Projects

- **CoHive – Cooperative Management Platform | 2025**

  Developed a web-based cooperative management platform for financial and organizational operations. Built backend services using Laravel, MySQL, and REST APIs.Developed responsive user interfaces using Blade, Tailwind CSS, and JavaScript.

- **AI-Based Conversational Chatbot | 2024**

  Developed a conversational AI system capable of understanding and generating context-aware responses using Natural Language Processing techniques. Implemented data preprocessing, model training, and evaluation pipelines using Python, TensorFlow, Hugging Face, and Google T5. Optimized response generation performance and designed a scalable workflow for handling diverse user inputs

- **Green Ranger | 2023 – 2024**

  Developed a web-based platform to manage environmental donation programs, volunteer activities, and recycling marketplace operations. Designed and implemented backend functionalities using Laravel and MySQL, including transaction management, user administration, and real-time waste exchange recording. Integrated payment processing workflows and performed end-to-end testing to ensure system reliability and data consistency.

Skills

Programming Languages: Python, JavaScript, PHP, SQL

Backend Development: Node.js, Express.js, Laravel, RESTful API Development, MySQL, Database Design

Frontend Development: HTML, CSS, Bootstrap, Tailwind CSS, React.js

Artificial Intelligence & Machine Learning: TensorFlow, Hugging Face Transformers, Scikit-learn, Deep Learning, Model Fine-Tuning

Natural Language Processing (NLP): Google T5, IndoBERT, Semantic Similarity, Text Classification, Document Similarity Analysis

Data Analysis & Processing: Pandas, NumPy, Matplotlib, Data Preprocessing, Feature Engineering

Computer Vision & OCR: Keras-OCR, TensorFlow, Image Augmentation, Object Detection, Text Recognition

Tools & Platforms: Git, GitHub, Postman, VS Code, MySQL Workbench, Jupyter Notebook

Soft Skills: Analytical Thinking, Problem Solving, Communication, Leadership, Team Collaboration, Adaptability, Time Management
